DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2, 4-5, 7-8, 10-11, 13-14, 17-20, and 25-43 are rejected under 35

U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has amended independent claims 1, 4, 7, and 10 to include the recitation of "no translational movement" during rotation. However, the Examiner finds no clear support in the instant written specification, specifically paragraph 0020, for such amendment. While there appears to be disclosure stating that there is "controlled translational movement (e.g. virtually no translational movement relative to the overall tipping machine)," this recitation is deemed insufficient to support the limitation "no translational movement" during rotation.

Allowable Subject Matter

Claims 15-16, and 21-24 are allowed.
